MO Batch

Write a java program to design a screen that welcomes the student with a welcome message.

Program

```
import java.awt.*;
import java.awt.event.*;
public class Awt extends WindowAdapter implements
ActionListener{
    Frame wel;
    TextField op;
    Button bt;
    Awt(){
        wel = new Frame();
        wel.addWindowListener(this);
        wel.setResizable(false);
        wel.setBounds(50, 50, 400, 400);
        wel.setLayout(null);
        wel.setVisible(true);
        op = new TextField();
        op.setBounds(50, 200,200, 30);
        wel.add(op);
        bt = new Button("Click");
        bt.setBounds(50, 150, 80, 30);
        bt.addActionListener(this);
        wel.add(bt);
    }
    public void windowClosing(WindowEvent e){
        wel.dispose();
    }
    public void actionPerformed(ActionEvent e){
        if(e.getSource() == bt){
            op.setText("Hey");
        }
    }
    public static void main(String... args){
        new Awt();
    }
}
```

Output
